

SMART AND RESILIENT CITIES  
FOR AN INNOVATIVE SOCIETY

# SUMMER SCHOOL

JULY 2019

**Be a professional in your field of study!**  
Summer School Smart and Resilient Cities 2019,  
will this year take place on HEI Yncréa Hauts-de-  
France campus, Lille.

# >> PROGRAM

Smart Cities is a rapidly growing concept in both research and policy practice. It is viewed as a solution for cities to better cope with key societal challenges like energy transition, mobility and social innovation through extensive and effective use of big data and IT.

This, in turn, calls for new modes of city – people – governance, with the active involvement of a wide diversity of public, private and citizens' organizations. During the one week course, Summer School Smart and Resilient Cities 2019 is offering you the chance to develop your creative thinking, to be a specialist in your field of study and perform under real-life working conditions. Professors from various research disciplines of the subject will work with you on different topics in smart and resilient cities domain. You will work across multidisciplinary fields and acquire useful experience in preparation for the future.

Smart and Resilient Cities is being studied through three themes. Firstly, we focus on Urban Context (history, development and challenges). Secondly, City and People (new modes of governance and behavioral change). And third, we analyze Industrial Innovation (Big and open data, geo informatics etc). Working with sketches, photographs, plans, aerial views etc ... students will explore

the urban context in heritage, socio-economic, landscape, environmental issues, bioclimatics, case study, real-site visits, seminar, and workshops.

HEI (a graduate College of engineering) was created in 1885, recognized by the French government and accredited by the French Engineering Accreditation Commission CTI since 1935.

The school focuses on its unique strengths: its close relationship with the world of business and economics, a humanistic approach and an engineering educational method that is tied to new career fields. HEI Yncrea is setting new horizons and goals, leading studies in Smart and Resilient Cities, seeking solution for cities and looking towards the future.

#### IN COOPERATION WITH

Summer School Smart and Resilient Cities 2019 is organized in collaboration with Escuela Politécnica Superior - CEU San Pablo de Madrid.

**CEU**  
*Universidad  
San Pablo*

## SCHEDULE

### 01 - JULY

#### Discovering Main challenges in Cities

- Welcoming and opening talks
- Discovering Lille urban history and context

### 02 - JULY

#### People and Cities

- Site visit - meetings with project managers and designers
- Workshop on design thinking/ smart cities as they could be

### 03 - JULY

#### New Technologies and The Third Industrial Revolution ('Rev3')

- Smart Campus visit - Université Catholique de Lille (Smart Home Applications based on Internet of Things, Building Information Models (BIM), Building Automation...)
- Design methods seminar with professors and professionals

### 04 - JULY

#### Mobility: Uses and Impacts

- Visit to Antwerp - meetings with TRACTEBEL company

### 05 - JULY

#### Urban Economics and Space

- Innovative collaborative spaces
- Final panel

### 06 - JULY

#### Smart Cities as It Could Be: Inclusiveness and Sustainability

- Final conference and closing remarks

## INFO

**Credits :** 3 ECTS

**Date:** 1-6 July 2019

**Tuition:** 1 250€

(visits, accommodation, travelling in Lille, certificate, closing cocktail, etc... included)

**Language :** English

**Location:** Lille, France

## TARGET GROUP

Students, researchers, and professionals from both the technical branch and the social sciences field are welcome to apply. Based on the motivation and background of the applicant, the summer School is also open to people who are interested in sustainable urban development in general.

## HOW TO APPLY

The Summer School is currently accepting applications for Summer School 2019 Programme.

Admissions information:

► [hei.master.smartcities@yncrea.fr](mailto:hei.master.smartcities@yncrea.fr)

Application timeline and deadlines:

Courses are open to admit students on a first-come, first-served basis and will be closed when they are full. Candidates are therefore encouraged to apply in advance.

**Please note that application will be closed after 30-May-2019.**

## HAUTES ETUDES D'INGENIEUR

13 rue de Toul - BP 41290  
59014 Lille Cedex - FRANCE

## ORGANIZING COMMITTEE

### Program Director

Prof. Ana Ruiz Bowen  
(Yncrea, Université Catholique de Lille)  
Prof. Guadalupe Cantarero Garcia (Phd)  
(EPS - Institute of Technology San Pablo CEU Madrid)

### Coordinator

Anne Lacour  
(Yncrea, Université Catholique de Lille)  
Prof. Tanya Zheng Tan  
(Yncrea, Université Catholique de Lille)  
Prof. Juan Arana Giralt  
(EPS - Institute of Technology San Pablo CEU Madrid)
